Sensitive Data Intelligence

Discover & classify sensitive data across any structured and unstructured data systems

- Detect hundreds of sensitive data attributes across industries and regions
- Enrich data catalogs with privacy and security metadata
- Classify data based on sensitivity and risk posture

DSR Robotic Automation

Accept DSR requests & automatically fulfill them using People Data Graph™

- Discover personal data in all structured and unstructured data systems
- Link link all personal data with its owners using People Data Graph™
- Manage entire DSR lifecycle from collection to reporting in the privacy portal to reduce instances of data sprawl

Data Mapping Automation

Monitor data processing activities & generate up to date Article 30 reports

- Maintain a central catalog of data assets and data processing activities
- Monitor changes in data associated with processing activities and trigger PIAs/DPIAs to assess risk
- Generate up to date record of processing & Article 30 reports

Data Breach Management

Streamline your incident and data breach management lifecycle

- Deploy a self-service privacy portal to capture all reported incidents
- Identify impacted users & personal data associated with an incident
- Utilize built-in privacy research to accurately notify required entities and users

Assessment Automation

Audit once and comply with multiple regulations

- Centralized workspace for collaboration, reviews and approvals
- Pre-built assessment templates for hundreds of regulation
- Maintain proof of compliance with an immutable log

Vendor Assessment

System of record, engagement, automation and insights for third-party privacy risks

- Audit once and comply with multiple regulations
- Collaborate and manage third-party assessments in one place
- Track third-party privacy ratings

Cookie Consent

Detect all cookies, trackers and tags on your website & collect user consent

- Scan & auto-categorize millions of existing cookies on your website
- Deploy a custom cookie banner based on user's location, language etc to collect user consent
- Monitor and report opt-in & opt-out rates for all your websites/cookies

Universal Consent

Capture user consent and synchronize it across all your systems

- Collect user consent from various collection points: forms, web, mobile
- Deploy a self-service platform for users to update their consent preferences at anytime
- Synchronize user consent across all your systems with a zero-code workflow orchestrator

Privacy Policy & Notice Management

Build, publish and manage privacy policies and notices for all your domains

- Manage hundreds of policies from a central dashboard
- Dynamically update policies based on changes in data processing & cookies on any your websites
- Customize policies in various languages and in-compliance with local regulations

Workflow Orchestration

Automate privacy management functions in your environment

- Develop & automate privacy functions using a zero code workflow builder
- Activate privacy workflows with various pre-built triggers
- Example: Auto trigger PIA/DPIAs in case of a sensitive data drift, modify or update personal data record upon receiving a DSR

Core Platform Capabilities

Privacy Portal - Securely collaborate with stakeholders regarding privacy tasks, avoiding personal data sprawl.

AUTI Bot - Tracks personal data, assists in processing tasks, and provides an easy-to-use natural language interface to quickly get answers from complex data.

Centralized Records - Comprehensive compliance records updated in real-time based on updates to data and assessments.

PrivacyOps Dashboard - Easy-to-use centralized dashboard for managing all privacy compliance functions throughout an organization.
